

U20
Carbonless

Carbonless paper designed
for offset printing.

When it comes to carbonless paper why run anything but the best?

U20 leads the market in runnability, appearance, imaging and sustainability.

Features

Continuing a 50-year tradition, Nekoosa's exclusive Image Lock™ technology delivers the darkest, most fade-resistant image in the business. Combine superior imaging with the brightest base stock available and it all adds up to exceptional readability that lasts. To top it off, all carbonless papers from Nekoosa are SFI® certified and made in the U.S.A.

Advantages For Printers

- + Designed for offset printing
- + Industry-leading runnability
- + Runs cleaner, uses less ink
- + Darkest, most fade-resistant imaging with Image Lock™ technology
- + Engineered for changing printing technologies
- + Compatible on a wide variety of printing platforms
- + Quick turnaround on custom sizes
- + Thickest, stiffest sheets for best runnability
- + Can be collated and micro-perfed

Advantages For Form Users

- + Features dark, crisp and durable imaging
- + Image darkens over time in normal office conditions
