

**WIDE FORMAT,
ULTRA LOW TACK POLYESTER**

NEKOOSA.COM

Ztac™ is an ultra-low tack, repositionable polyester film designed for easy application and removal on very smooth indoor surfaces.

Ztac is a premium graphic film that combines a dimensionally stable polyester and a proprietary adhesive system that is easy to apply, reposition multiple times, and remove without leaving a trace of residue behind. No matter how many times Ztac is repositioned, it will keep its original shape and will not dog ear. Especially designed for ease of installation, Ztac is perfect for indoor applications to very smooth surfaces such as windows, glass, and polished metal*. Ztac is PVC free and can be recycled as a #1 polyester.

Ztac™ UV White and Clear

Manufactured in rolls to match the specific characteristics of UV-curable wide format print systems, Ztac UV Wide Format enables designers to use the Ztac technology for even more applications. Ideal for large format temporary signage and marketing applications, it will adhere to a wide range of smooth indoor surfaces, including glass, wood, metal, and polished stone. Ztac is composed of a 3 mil. polyester (PET) film and a 63# printable paper backer. The low-tack adhesive coating is applied in a special pattern that enables bubble-free installation, repositioning and re-use and will stay on the surface up to one year.

* Ztac is not recommended for computer or tv screens.

Applications

- In-Store Promotional Signage
- Large Format Graphics
- Tileable Murals
- P.O.P. Signage
- Reverse Sided Graphics
- Trade Show & Event Signage
- Window Graphics
