

Catapaque™ is a bright white, opaque polypropylene film with excellent opacity for two-sided printing.

Catapaque™ Luster Bright White

Catapaque is a two-sided polypropylene film for two-way advertising. Unlike competing block-out substrates, Catapaque has excellent lay-flat characteristics and superior dimensional stability for precise color registration. Can be sewn and grommeted, making it exceptional for use in the construction of banners and pennant strings.

Pair with Mojave Mounting Film for a complete window solution.

Applications

Banners
Pennant Strings
P.O.P. Displays
Advertising Graphics

Product Information

Excellent opacity for two-sided printing
Superior lay-flat characteristics
Superior dimensional stability for exceptional color registration
Sheets easily and cleanly
Easy to print using UV inks
Easy to sew, grommet, and heat seal
Economically priced and recyclable

Print Compatibility

UV Wide Format
