

Superior dry times using standard offset conventional inks make SYNAPS OM the optimal choice for short-run, on demand printing.

## SYNAPS OM

Waterproof, tear-proof and weather resistant - suitable for indoor and outdoor applications

Dries quickly without the need for special offset inks – just like uncoated paper

Superior dimensional stability for precise registration – less shrinkage and distortion on press

High grade opaque polyester film – PVC free

Rigid and lays flat

Double sided matte white finish – Printable on both sides

Alternative to traditional pocket lamination

Available in 5, 8, 10 and 14 mil digital cut sizes, folio sheets and wide format rolls

**Print Compatibility:** Offset (Conventional and UV), HP Indigo, Latex and UV Wide Format

*Also Available in Wide Format Rolls* – SYNAPS OM is a latex and UV wide format printable polyester film that will not bow, curl or warp. Use SYNAPS OM to create banner stands that won't wrinkle or fray on the edges and printed panels that will lay flat even after rolled.

## Applications

Menus

Maps

Manuals & Catalogs

Shelf Talkers & Wobblers

Membership & I.D. Cards

Hole Punched Tags

### Additional Information:

For print recommendations and more specific technical data, visit [agfa.com/specialty-products/solutions](http://agfa.com/specialty-products/solutions)

### Compatible Finishing Methods:

Die cut, score, drill, grommet, fold, perforate, bind, varnish and aqueous coat, emboss and hot foil stamp, staple bind, guillotine cut, laser cut, engrave, perforate, spiral bind, plotter cut and roll trim

### Recycling:

- Polyesters can be incinerated safely (according local regulations) and therefore are a potential source of energy as inert materials they can be buried in approved landfill facilities
- Contains 40% or more, mostly pre-consumer, waste
- SYNAPS OM has plastic recycling code "7 - Other". SYNAPS OM is a polyester that is quite different from the type of polyester that is used for the production of PET bottles for instance. It can be recycled but post-print SYNAPS OM is to be treated as waste because the ecological cost of collecting and selecting the waste is higher than the ecological benefit. Regulations for waste disposal may differ per country so please consult the local regulations.
