

SYNAPS XM is the superior alternative to traditional lamination.

SYNAPS XM

Minimal scrap, waste and time compared to traditional lamination

Waterproof, tear-proof and weather resistant – suitable for indoor and outdoor applications

Double sided matte white finish

Superior dimensional stability for precise registration

Antistatic top coating ensures strong toner adhesion and smooth feeding through the printer

Rigid and lays flat

Die cut, perforate, UV varnish and scoring capabilities

Writable with pencil, ball point pen or marker

Available in 5, 8, 10, 12 and 14 mil digital cut sized sheets

Print Compatibility: Digital Dry Toner/Laser

Conditions for Use	
Shelf Life	2 years
Resistance To Dry Ice	Tested for 5 days at -110 °F (-79 °C)

Additional Information:

For print recommendations and more specific technical data, visit agfa.com/specialty-products/solutions

Compatible Finishing Methods:

Die cut, score, drill, grommet, fold, perforate, bind, varnish and aqueous coat, emboss and hot foil stamp, staple bind, guillotine cut, laser cut, engrave, perforate, spiral bind, plottwer cut and roll trim

Recycling:

- Polyesters can be incinerated safely (according local regulations) and therefore are a potential source of energy as inert materials they can be buried in approved landfill facilities
- Contains 40% or more, mostly pre-consumer, waste
- SYNAPS XM has plastic recycling code "7 - Other". SYNAPS XM is a polyester that is quite different from the type of polyester that is used for the production of PET bottles for instance. It can be recycled but post-print SYNAPS XM is to be treated as waste because the ecological cost of collecting and selecting the waste is higher than the ecological benefit. Regulations for waste disposal may differ per country so please consult the local regulations.
