Service Temp. Range	0° F to 105° F (-17.8° C to 40.5° C)					
Outdoor Durability	None					

= PVC-Free

General Printing and Designing Guidelines:

- Design for finished sizes of at least 3"x5" (8x12 cm).
- Convert PMS spot colors to CMYK process-ink builds.
- Stay within a total area coverage (TAC) of 220% in color build with a line screen of 150-175, and reduce screen values by using UCR or GCR.
- Avoid heavy deposits of ink near the edge to avoid curling.
- Right reading or reverse printing is possible.
- A 1" (2.5 cm) unprinted border will enhance the performance of the application.
- This product is not suitable for screen printing or any type of coating, including varnishes or aqueous and UV coatings.

Storing:

- Store in the original packaging at room temperature 65° F-80° F (18° C-27° C) with relative humidity of 25-50%.
- Acclimate the material to press room temperature for 24 hours prior to printing.
- Remove material from plastic bag right before the loading the press.
- Reseal unused materials in the original plastic bag.
- Paper liner is moisture sensitive and can curl if improperly stored.
- Unprinted ClingZ can be stored for up to one year.

Additional Information:

- ClingZ is not to be confused with static cling vinyl. Static cling vinyls adhere to glass because of their high plasticizer content. They do not cling by static. Only ClingZ gets its cling properties due to having an embedded static charge.
- ClingZ is recyclable as a #5 plastic. Confirm specific recycling guidelines with your local municipality.
